Il verde di Marte. Trilogia di Marte-Kim Stanley Robinson 2020

Il blu di Marte-Kim Stanley Robinson 2017-02-14 Mari e fiumi si sono formati sulla superficie di Marte e il pianeta rosso è ormai solo un retaggio del passato, nulla di più lontano dalla landa desolata e inospitale degli albori dell'espansione interplanetaria. Eppure c'è chi, come i Rossi, rimpiange il tempo in cui erano le aride sabbie a ricoprire la superficie marziana. Per loro, la ribellione a chi ha fatto di Marte una sorta di nuova Terra è l'unica via contro l'oblio che ha cominciato a inghiottirne la storia, soprattutto ora che un nuovo pericolo minaccia di cancellare per sempre qualsiasi retaggio del passato. Sulla Terra, una catastrofe di dimensioni apocalittiche ha messo in ginocchio la popolazione già stremata da inquinamento e sovraffollamento. Marte sta per essere investito da una massiccia ondata migratoria, un'emergenza che rischia di compromettere il delicato equilibrio tra le fazioni in campo e scatenare una guerra interplanetaria cruenta e definitiva. Il capitolo conclusivo di un'avventura appassionante e visionaria, una pietra miliare della narrativa SciFi.

O abismo vertiginoso-Carlo Rovelli 2021-08-20 Una visione instigante da teoria quântica, do mesmo autor de Sete breves lições de física. Considerado pela crítica como o "novo Stephen Hawking", Carlo Rovelli consegue levar os principais conceitos da física ao leitor comum de forma clara e acessível. A física quântica nos levou a inúmeras descobertas e avanços científicos. Nossa compreensão do mundo é baseada nessa teoria, ainda que, para muitos, ela pareça um mistério. Ao unir ciência, história e filosofia, Rovelli nos mostra as ideias "vertiginosas" por trás do mundo quântico, ajudando a elucidar alguns conceitos que mudaram a nossa forma de ver a realidade. Este é um livro para quem não conhece física quântica, mas está disposto a entender um pouco de suas ideias e implicações. É também uma discussão para cientistas e filósofos, como uma forma de diálogo, na tentativa de atingir uma perspectiva geral. É, enfim, um livro conciso e plural, que nos ajuda a vislumbrar as maravilhas de um mundo novo. "Rovelli é um gênio, e um comunicador incrível. É aqui que a ciência ganha vida." — Neil Gaiman "Um dos mais calorosos, elegantes e lúcidos intérpretes a explicar, às pessoas comuns, os intrincados enigmas de sua disciplina. Um livro grandioso." — John Banville, The Wall Street Journal

Filosofia e fantascienza. Spazi, tempi e mondi altri-Antonio Lucci 2019-03-15 «L'uomo, senza utopia, precipita nell'inferno di una quotidianità che lo espropria di ogni significato e lo uccide poco a poco; ma non appena

mette mano alla realizzazione di quella utopia, al tempo stesso prepara le condizioni per una quotidianità sempre più atroce». Così, più di vent'anni fa, il matematico, mediattivista e futurologo prematuramente scomparso nel 2013 Antonio Caronia (1996, p. 58), riassume il nesso inscindibile che lega, come in un inquietante nastro di Moebius, le utopie alle distopie.

Manuale di scrittura di fantascienza-Franco Ricciardiello 2020-12-01 La fantascienza è oggi un genere di enorme successo: nel cinema, nelle serie tv, in fortunate saghe letterarie, il pubblico cerca visioni del futuro che si riflettano sul nostro presente e ci aiutino tanto a sognare, quanto a capire. Le storie di fantascienza, distopiche, di speculative fiction e di narrativa di anticipazione alla Black Mirror hanno una comunità di lettori e lettrici attenti, esigenti e sensibili alla qualità, oltre che ai contenuti teorici. Gli scrittori e le scrittrici ne sono consapevoli, ma hanno spesso pochi strumenti per lavorare in modo professionale e soddisfacente, senza incorrere nei problemi tipici di un genere amato, ma complesso e ancora poco conosciuto nei suoi meccanismi interni. Questo manuale nasce per aiutare chi si avvicina alla scrittura speculativa a farlo nel modo migliore: dopo una introduzione che delinea una rapida panoramica sulla tradizione della fantascienza, espone (con agili schede di lettura) quello che è utile sapere sul canone di riferimento e sui "luoghi comuni" che non si possono ignorare. Ma lo fa in chiave operativa, concentrandosi sul funzionamento delle storie, sulla loro costruzione, sugli aspetti principali da conoscere per cominciare a scrivere subito. Un metodo pratico di scrittura che spiega chiaramente cosa fare (e come farlo meglio) e cosa non fare, il tutto pensato per mettere autori e autrici in condizione di scrivere più facilmente e più velocemente, con cognizione di causa e con l'amore per un genere che è principalmente un punto di vista, e che si presta a infinite declinazioni una volta compresa la sua essenza peculiare. Giulia Abbate editor e coach di scrittura, è cofondatrice di Studio83, agenzia di servizi letterari di sostegno ad autori e autrici esordienti. Ha pubblicato il romanzo ucronico Nelson (Delos Digital) e racconti apparsi in numerose antologie collettive, raccolti in Lezioni sul Domani e Stelle Umane. Cura per Delos Digital la collana di racconti di fantascienza sociale "Futuro Presente" e collabora con riviste e portali dedicati alla letteratura di genere. Nel 2018 ha vinto due premi Italia, nelle categorie "Miglior articolo" e "Miglior racconto" su riviste amatoriali. Nel 2019 ha pubblicato il romanzo La cospirazione

dell'inquisitore (Fanucci), e curato la raccolta Next-Stream. Visioni di realtà contigue (Kipple). Franco Ricciardiello comincia a pubblicare fantascienza a vent'anni. Nel 1998 vince il premio Urania per il miglior romanzo di fantascienza italiano con Ai margini del caos (Mondadori), tradotto in Francia da Flammarion. Ha insegnato per quasi vent'anni Scrittura creativa a Biella, Vercelli e Genova, e tiene seminari sulla letteratura a Torino, Napoli, Cosenza e Novara. Ha collaborato all'enciclopedia a dispense Scrivere della Rizzoli con una serie di schede su celebri opere della letteratura mondiale e con il volume dedicato allo "Stile letterario". Oggi ha all'attivo tre romanzi di fantascienza, due gialli, un thriller e un romanzo contemporaneo, più tre volumi che raccolgono la maggior parte dei suoi racconti apparsi in riviste e antologie in Italia, Francia, Grecia e Argentina. Per Meridiano Zero ha pubblicato L'ombra della luna (2018). Per Odoia ha già pubblicato Storie di Parigi (2017), Storie di Venezia e Storie di Torino (2018).

Stranger in a Strange Land-Robert A. Heinlein 1987-05-15 Robert Heinlein's Hugo Award-winning all-time masterpiece, the brilliant novel that grew from a cult favorite to a bestseller to a science fiction classic. Raised by Martians on Mars, Valentine Michael Smith is a human who has never seen another member of his species. Sent to Earth, he is a stranger who must learn what it is to be a man. The Man in the High Castle-Philip K. Dick 2012-01-24 "The single most resonant and carefully imagined book of Dick's career." —New York Times It's America in 1962. Slavery is legal once again. The few Jews who still survive hide under assumed names. In San Francisco, the I Ching is as common as the Yellow Pages. All because some twenty years earlier the United States lost a war—and is now occupied by Nazi Germany and Japan. This harrowing, Hugo Award-winning novel is the work that established Philip K. Dick as an innovator in science fiction while breaking the barrier between science fiction and the serious novel of ideas. In it Dick offers a haunting vision of history as a nightmare from which it may just be possible to wake. Winner of the Hugo Award

Martian Time-Slip-Philip K. Dick 2012-10-23 "The writing is humorous, painful, awesome in its effect on both mind and heart . . . There are few modern novels to match it."—Rolling Stone On an arid Mars, local bigwigs compete with Earth-bound interlopers to buy up land before the UN develops it and its value skyrockets. Martian Union leader Arnie Kott has an ace up his sleeve, though: an autistic boy named Manfred who seems to have the ability to see the future. In the hopes of gaining an advantage on a Martian real estate deal, powerful people force Manfred to send them into the future, where they can learn about development plans. But is Manfred sending them to the real future or one colored by his own dark and paranoid filter? As the time travelers are drawn into Manfred's dark worldview in both the future and present, the cost of doing business may drive them all insane.

The Wild Shore-Kim Stanley Robinson 2013-12-31 The Wild Shore is the first novel in Kim Stanley Robinson's highly-acclaimed Three Californias Trilogy. 2047: For the small Pacific Coast community of San Onofre, life in the aftermath of a devastating nuclear attack is a matter of survival, a day-to-day struggle to stay alive. I marziani-Kim Stanley Robinson 2020-02-06 È possibile inventare un mondo veramente nuovo? Dobbiamo creare una nuova Terra? O dobbiamo ideare un mondo diverso, attenti a non alterare quella verginità primordiale del pianeta rosso? Perché nel momento in cui i marziani siamo noi, liberarci dal modo indissolubilmente umano che abbiamo di pensare si rivela una sfida tanto ardua quanto scalare la vetta più alta del sistema solare. In un fenomenale ribaltamento cromatico, infatti, l'ambientalismo diventa rosso, non più il colore del fuoco che distrugge, ma quello del pianeta da proteggere, mentre il placido verde terrestre è ormai il simbolo violento dell'invasione, della colonizzazione. Così come l'America, anche Marte esisteva prima della sua "scoperta": i tumulti e le lotte che lo agitano ci ricordano che il sovrumano potere della tecnica non è mai neutrale o intrinsecamente positivo, non è cioè un segnale del progresso, ma uno strumento al servizio degli umani e delle loro idee. Ne I marziani Kim Stanley Robinson arricchisce l'universo della Trilogia di Marte con elementi eterogenei e testi diversissimi: esplorazioni della natura rossa, storie di rivoluzionari, storie d'amore che s'interrompono e riprendono a distanza di secoli, moderne leggende sugli abitanti veri o presunti delle profondità del pianeta, articoli scientifici e perfino la Costituzione di Marte. I marziani ci permette di arrivare sul pianeta rosso e vederlo attraverso gli occhi dei marziani: sognavamo d'incontrare alieni favolosi e abbiamo trovato noi stessi. Kim Stanley Robinson torna con un romanzo corale che conclude la Trilogia di Marte, una delle opere più premiate di tutta la narrativa sci-fi.

The Simulacra-Philip K. Dick 2011 A disparate group of characters are

brought together on a ravaged Earth and must contend with an underclass that's starting to ask too many questions.

Futureland-Walter Mosley 2001-11-12 The place is the United States. The time, the near-future, 2020-2040. Here, justice is blind and the ranks of the disenfranchised have swollen to a toxic level. High-tech rules the day while human nature, for better or worse, remains constant. In nine interwoven tales, Mosley paints a keen if fictional portrait of what the future could hold if our own political climate continues. From Ptolemy Bent, the child genius whose act of mercy lands him in the world's first privatized prison, to Fera Jones, a heavy-weight champ who gives up the ring for a political career, characters appear and reappear in different storylines as everyone tries to survive a fast and furious "Futureland".

Icehenge-Kim Stanley Robinson 2014-01-07 An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: Icehenge. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian Revolution, in the lost memories of those who have lived for centuries. Antarctica-Kim Stanley Robinson 2010-07-21 The award-winning author of the Mars trilogy takes readers to the last pure wilderness on Earth in this powerful and majestic novel. "Antarctica may well be the best novel of the best ecological novelist around."—Locus It is a stark and inhospitable place, where the landscape itself poses a challenge to survival, yet its strange, silent beauty has long fascinated scientists and adventurers. Now Antarctica faces an uncertain future. The international treaty which protects the continent is about to dissolve, clearing the way for Antarctica's resources to be plundered, its eerie beauty to be savaged. As politicians wrangle over its fate, major corporations begin probing for its hidden riches. Adventurers come, as they have for more than a century, seeking the wild, untamed land even as they endanger it with their ever-growing numbers. And radical environmentalists carry out a covert campaign of sabotage to reclaim the land from those who would destroy it for profit. All who come here have their own agenda, and all will fight to ensure their vision of the future for the remote and awe-inspiring world at the South Pole. Praise for Antarctica "Forbidding yet fascinating, like the continent it describes . . . echoes Jon Krakauer's Into Thin Air."—People "[Antarctica] should be included in any short-list of books about the frozen continent.... Compelling characters...a

rich and dense story...Robinson has succeeded not only in drawing human characters but also in bringing Antarctica to life. Whatever happens in the outer world, Antarctica—both the book and the continent—will become part of the reader's interior landscape."—The Washington Post Book World "The epic of Antarctica. This is the James A. Michener novel of the South Pole. If the meaty one-word title didn't give it away, the writing would. The whole human history of the continent is here."—Interzone "Antarctica will take your breath away."—Associated Press "A gripping tale of adventure on the ice."—Publishers Weekly "Passionate, informed...vastly entertaining."—Kirkus Reviews "Robinson writes about geography and geology with the intensity and unhurried attention to detail of a John McPhee."—The New York Times Book Review

Desolation Road-Ian McDonald 2014-01-31 It all began thirty years ago on Mars, with a greenperson. But by the time it all finished, the town of Desolation Road had experienced every conceivable abnormality; from Adam Black's Wonderful Travelling Chautauqua and Educational 'Stravaganza (complete with its very own captive angel), to the Astounding Tatterdemalion Air Bazaar. Its inhabitants ranged from Dr. Alimantando, the town's founder and resident genius, to the Babooshka, a barren grandmother who just wants her own child - grown in a fruit jar; from Rajendra Das, mechanical hobo who has a mystical way with machines to the Gallacelli brothers, identical triplets who fell in love with - and married - the same woman. REVIEWS "Ian McDonald's Desolation Road is one of my most personally influential novels. It's an epic tale of the terraforming of Mars, whose sweep captures the birth and death of mythologies, economics, art, revolution, politics... Desolation Road pays homage to David Byrne's Catherine Wheel, to Ray Bradbury's entire canon and to Jack Vance, blending all these disparate creators in a way that surprises, delights, then surprises and delights again." - Cory Doctorow (Boing Boing) "McDonald's first novel, it absolutely bowled me over when it came out, and while I have read everything he's published since, and admire all of it and like most of it, this remains my favourite... some of the most beautiful prose imaginable... If you ever want to demonstrate how different science fiction can be, what an incredible range and sweep of things are published with a little spaceship on the spine, Desolation Road is a shining datapoint, because it isn't like anything else and yet it is coming from a knowledge of what the genre can

John Carter e la principessa di Marte-Edgar Rice Burroughs 2021-06-02
Nella premessa del libro l'autore spiega che ha trovato un manoscritto del suo defunto zio John Carter e che la storia narrata è vera. John Carter, un ex ufficiale della cavalleria sudista, scappando dagli indiani mentre faceva il cercatore d'oro, si rifugia in una caverna in cui perde la capacità di muoversi e da cui viene misteriosamente trasportato su Marte. Qui è catturato da una razza mostruosa di giganti a sei zampe chiamata “uomini verdi”, stupiti dalle sue capacità di saltatore per via della minore forza di gravità del pianeta. Ben presto, in seguito a una scalata sociale dovuta all'uccisione di alcuni di questi esseri, diventa uno dei capi degli uomini verdi della tribù di Thark, rimanendo comunque loro prigioniero. Poco dopo il suo arrivo una donna degli uomini rossi, altri indigeni di Marte ma più simili agli uomini della Terra, viene catturata a sua volta: si tratta della principessa della città-stato di Helium, Dejah Thoris, di cui John Carter s'innamora trovando corrisposto il suo sentimento.
